

Thrive is a premium digestive support supplement designed to help release trapped nutrients and vitamins in cooked and processed foods. Simply take one to two capsules right before eating breakfast, lunch, and dinner to support healthy digestion.

THRIVE

DIGESTIVE ENZYMES + PROBIOTICS

ACTIVE INGREDIENTS

Amylase enzyme: Breaks down carbohydrates (e.g., pastas, breads, cookies, bagels, oats) into simple sugars that the body uses for energy.

Protease and Peptidase enzymes: Break down bonds in protein (e.g., meats, nuts, beans, seeds) into amino acids, the building blocks of proteins.

Lipase enzyme: Breaks down fats (e.g., meats, dressings, oils, dairy) into fatty acids that the body uses for energy and hormone production.
